Hello DMP + RoadSmart Prototype: Feature Report

October 2026

Labels. Already = in the current Hello DMP app (screenshots, APK v1.0.5). Zarif = in the DMP RoadSmart proposal, the only source naming Zarif (byline: Md. Zarif Bin Hasnat and Abrar Shahriar, so this attribution assumes the proposal counts as Zarif's). Workbook "new" items that the proposal already shows are listed under Zarif with the page. Abrar = new items found in neither (workbook recommendations, STEP note). Needs Verification = existence or wiring unclear.

Status. Implemented means the workflow works end to end; outside systems (SMS, NID, BRTA, payment, 999) are simulated and the screen says so. Testing: 18/18 end-to-end workflows pass, 46 routes crawled at 3 screen sizes with no errors, axe WCAG AA scan clean, offline reload works.
